## **THE MESOCOSMOS AND BIOLOGICAL ARCHITECTURE.**

### *2.1- Two paradigms in the Architecture of the Universe*

The vision of the material world and therefore the vision of the architectural design are dictated by the vision of Physics. In the best case of modern physics, in the great majority, of a poorly understood physics, there are more than 500 years. In modern physics, there are two contradictory paradigms that define the way of seeing and therefore the task in scientific development. In the world view, it is that belief system that determines the way we conceptualize, design and constructs the spaces we will inhabit. These two paradigms correspond to a vision of the disconnected world and another vision of the connected, inclusive, holistic or fractal world.
